Senator Umberg
State Capitol
Sacramento, CA 95814

Subject: Support, SB-66, Senator Tom Umberg

Dear Senator Umberg:

The California Chamber of Commerce is writing to express our support for SB 66, which requires and funds the carrying of opioid antagonists by first responders.

Our members agree that having a stable, healthy and safe community will create an environment for economic success. The opioid epidemic is a serious public health emergency that is having a dramatic impact on the stability of our workforce and how safe our communities are, as well as the overall health/ wellness of the state of California. SB 66 takes a common sense approach to addressing this public health crisis, ensuring that our Peace Officers, Firefighters and Emergency Medical Technicians have access to an essential life-saving medication to prevent an unintentional overdose. The proposed bill is thoughtfully developed and is using Opioid Settlement Funds in a responsible manner for the benefit of the community directly at the source of the opioid overdose epidemic. The responsible and targeted usage of funds provided by the Opioid Settlement provides a solution to the current crisis that will also benefit the state. The comprehensive training required in addition to the distribution of antagonist drugs will help to ensure that these life-saving tools are used effectively and safely.

For these reasons, the California Chamber of Commerce respectfully supports SB 66. We believe this measure will strengthen our public health infrastructure, save lives, and contribute to the safer, more resilient communities that are necessary for a thriving business climate. We urge a favorable vote.

Sincerely,

The California Chamber of Commerce
