The Honorable Mike McGuire
Senate Committee on Agriculture and Natural Resources,
5400 N Lake Rd SSB 160

Subject: Support. SB-2, Senator Mike McGuire

Dear Senator McGuire,

The Sierra Club writes regarding “Forest Management”, aiming to reduce forest fires. This policy aligns with our position on prescribed burnings.

In recent years, wildfires have torn through California, beginning at our dearest forests. Forest fires require immediate intervention and prevention. Prescribed burnings are to promote tree growth, restore vegetative communities as well as natural fire regimes. Moreover, removing dead vegetation that contribute to forest fires can weaken future fires. Additionally, prescribed fires are to serve as a buffer to communities surrounding forests. Sierra Club supports the use of prescribed burnings on those conditions. SB-2 meets those conditions and would work with experienced firefighters to achieve these results.

For these reasons, the Sierra Club supports this bill.
