The Honorable Lena Gonzalez
Assembly Committee on Local Government & Labor
1020 N Street, Room 157

Subject: Support. SB-39, Senator Lena Gonzalez

Dear Senator Gonzalez,

The Sierra Club writes regarding “Clean Air Near Schools Act”. This policy aligns with our position on Fossil Fuels.

Air pollution affects everyone in proximity to the source of it. Children are especially vulnerable. Air pollutants are known to release carcinogens, as well as increasing the risk of respiratory disorders, lung cancer, asthma, reproductive harm, and more. Oil drilling contributes to air pollution. Sometimes, oil drilling occurs near schools and residential zones. This practice puts children at risk for developing diseases and must be stopped promptly. SB 39 would protect children and families by prohibiting oil drilling near schools, residential zones and daycare areas and would set an expiration for current oil drilling practices near these areas.

For these reasons, the Sierra Club supports this bill.
