The Honorable Anna Caballero
Senate Committee on Agriculture and Natural Resources
5400 N Lake Rd SSB 160

Subject: Support. SB-55, Senator Anna Caballero

Dear Senator Caballero,

The Sierra Club writes regarding “Groundwater Recharge and Aquifer Protection Act”. This policy aligns with our position on Agriculture.

The ongoing drought has significantly depleted our sources of water, especially in the Central Valley. Water scarcity is a grave concern to us and to many. Farmers have to pump out groundwater to the point where it’s endangering the groundwater supply. SB 55 would allow for recharge basins, manmade ponds that take in surface water while replenishing ground water. This would improve the water retention capacity of the land in the long run and would provide sustainable solutions to the Central Valley’s water needs.

For these reasons, the Sierra Club supports this bill.
