The Honorable Benjamin Allen
Senate Committee on Agriculture and Natural Resources
5400 N Lake Rd SSB 160

Subject: Support. SB-60, Senator Benjamin Allen

Dear Senator Allen,

The Sierra Club writes regarding “Wildfire Resilience and Preparedness Act”, establishing a program to prevent and to deter wildfires. It also would enable communities neighboring the forests to be prepared for wildfires. This policy aligns with our goals for forest management.

Wildfires have spread throughout California, especially in recent years, without a sign of a break, beginning with our beloved forests. These fires cause serious damage to forests, and if not prevented, can spread to communities around said forests. They require immediate attention to prevent further spreading. SB 60 responds to the urgent need for forest management by reducing the intensity of fires while also protecting neighboring residential areas. Additionally, this bill would allow for the coordination of prescribed fires with Native American tribes, in respect for their culture which we acknowledge.

For these reasons, the Sierra Club supports this bill.
